Map Name:	ttt_eruption
Map Size:	Medium/large

Map Description
<p>TTT_Eruption is a that's all about the volcano, at random intervals the volcano erupts and shoots out insta kill entities or something of the lick that disappear on impact. Players have to choice to hide in one of the 3 safe zones or venture out in the deadly wasteland during the eruption.</p> <p>(During the eruption water will do dmg (cause its boiling) and there will be a red orangy fog?)</p> <p>MAP COLOUR EXPLANATION:</p> <p>orange= traitor doors that go into the traitor room directly under the volcano.</p> <p>Purple= safezones from eruption (maybe a shield players can pass through but objects cant?) or a bunker</p> <p>Top left= factory town, here spawns all guns besides pistols (no enterable buildings or rooftops unless mlg surf)</p> <p>Bottom right= spawnharbor, breakable buildings that get rekt during eruption time (you can decide to try your luck or play it safe @ the safezones) in spawntown there only spawns pistols.</p> <p>The grey boats are the floatable boats u made for specific ocean only unbreakable (if possible).</p> <p>LOOT ISLAND= on here you can find: 1 awp, 1 set of armor that increases hp to 150 and aks. The risk of lootisland lies in the yellow cones that scan the perimeter, if you get hit by the cone you get instakilled (kinda like a mission impossible enter place to get into the loot island)</p> <p>YELLOW ON VOLCANO= a parkour climb with hard to make jumps to</p>

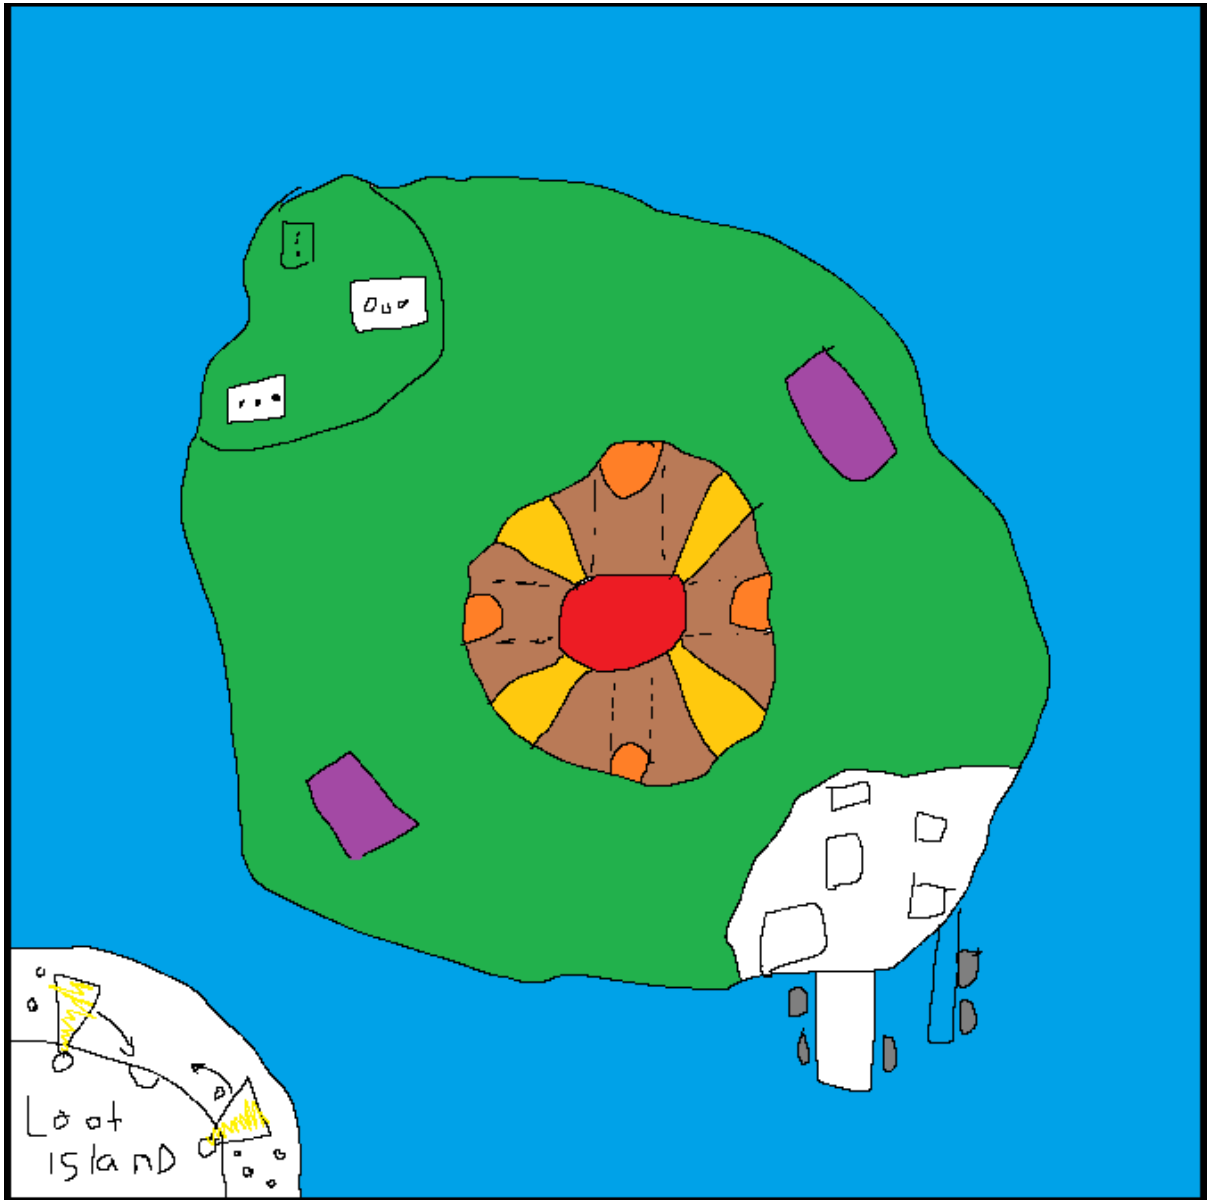

get to the top of the volcano. Here you have a great vantage point that loops around the top of the volcano but you're at risk of snipes and eruptions. You can also throw bodies into volcano to make them disappear.

Map Picture 1 - Birds Eye View

A drawing of the birds eye view of the map layout (Like a CSGO Radar image or the radar map on summoners rift)

(Include them in the white space below on this page)

Map Picture 2 - Extras

Drawings of any extra detail you'd like to give. Could be a picture of the main gimmick or an important area, or just of whatever else you want to include.

(Include them in the white space below on this page)

(volcano t entrance+climb)

Loot island (dots are mines)
